

Resultado reto HackerRank día 1 con C#

```
1 using System;
2 using System.Collections.Generic;
3 using System.IO;
4
5 class Solution {
6     static void Main(String[] args) {
7         int i = 4;
8         double d = 4.0;
9         string s = "HackerRank ";
10
11
12         // Declare second integer, double, and String variables.
13         int inputInt;
14         double inputDouble;
15         string inputString;
16
17         // Read and save an integer, double, and String to your variables.
18         inputInt = Convert.ToInt32(Console.ReadLine());
19         inputDouble = Convert.ToDouble(Console.ReadLine());
20         inputString = Console.ReadLine();
21
22         // Print the sum of both integer variables on a new line.
23         Console.WriteLine(i + inputInt);
24
25         // Print the sum of the double variables on a new line.
26         Console.WriteLine((d + inputDouble).ToString("F1"));
27
28         // Concatenate and print the String variables on a new line
29         // The 's' variable above should be printed first.
30         Console.WriteLine(s + inputString);
31     }
32 }
```
