HackerRank > Reto-dia-1 > main.py > i

```
1 i = 4
2 d = 4.0
3 s = 'HackerRank '
4
5 # Declare second integer, double, and String variables.
6
7 # Read and save an integer, double, and String to your variables.
8 input_int = int(input())
9 input_double = float(input())
10 input_string = (input())
11 # Print the sum of both integer variables on a new line.
12 print(i + input_int)
13 # Print the sum of the double variables on a new line.
14 print(round(d + input_double, 1))
15 # Concatenate and print the String variables on a new line
16 # The 's' variable above should be printed first.
17 print(s + input_string)
```
